Projects

Chat Mobile Application

Jan. 2021 - Feb. 2021

- Built a mobile application that allows users to send messages, images, and locations to another signed-in user.
- Authenticated users anonymously through Firebase authentication.
- Used React Native, Expo, and the Gifted Chat library for development and testing.
- Stored conversations in Firestore Database and images in Firebase Cloud Storage.

myFlix Application

Nov. 2020 - Dec. 2020

- Built a single-page application using the MERN stack, that lets users view and interact with a list of movies, add/delete movies from their list of favorites, and update/delete their profile accounts.
- Utilized HTTP and JWT-based authentication so that only authorized users can use the application.
- Tested the API endpoints using Postman to make sure requests to the API functioned properly.
- Deployed the app to Heroku.

Harry Potter Application

Oct. 2020 - Nov. 2020

- Built an application with JavaScript that fetches data from an external Harry Potter API, and lets users view details about the characters.
- Utilized DOM manipulation to change the site appearance based on conditions.
- Tested the application in Chrome, Firefox, Safari, Edge, and Internet Explorer 11 to make sure the UI was consistent throughout different browsers.
- Incorporated promise and fetch polyfills to make sure the app works properly in older browsers.

Experience

Project Coordinator

Oct. 2019 - April 2020

Velex Inc., Ontario CA

- Worked in cross-functional teams to efficiently manage construction projects in the Southern California region.
- Utilized Excel and AccuV - an inhouse software - to accurately record and update project milestones, purchase orders, and invoices.
- Maintained an open line of communication with tower technicians to finish closeout packages and guarantee successful project completion within the desired timeframe.
- Created documentation on how to better navigate and use AccuV and a few other software systems, promoting more use of in-house technology by those who normally wouldn't utilize them.

Project Lead

June 2019 - July 2019

Newcastle University Business School, UK

- Managed a small-scale research project to understand students' perceptions of the Business School's employability activities and resources.
- Analyzed various academic publications and created a campus-wide survey to better understand universities' employability measures and student's perceptions.

Education

Full Stack Web Development

Sep. 2020 - March 2021

CareerFoundry, Online

MSc Innovation, Creativity, and Entrepreneurship

Sep. 2018 - Sep. 2019

Newcastle University, United Kingdom

BS Business Administration (CIS)

Sep. 2014 - May 2018

California State Polytechnic University, Pomona

Summary

A Project Coordinator-turned-Web Developer skilled in JavaScript, HTML, CSS, and the MERN stack. Experienced working with tight deadlines, limited resources, and collaborating with cross-functional teams to effectively solve problems and reach project completion.

Technical Summary

- HTML
- (S)CSS
- JavaScript ES6+
- Node
- React
- Express
- MongoDB
- React Native
- Visual Studio Code
- Trello
- Git
- GitHub
- Command Line Interface
- Research
- Postman
- Heroku

Core Competencies

- Communication
- Collaboration/Teamwork
- Planning/Time Management
- Prioritization
- Multi-tasking
- Self-motivated

Certifications

- CareerFoundry: Intro to Frontend Development - October 2020 (No Expiration)
- CompTIA IT Fundamentals (ITF+) FC0-U61 - March 2020 (No Expiration)
- CLD261x: Microsoft Office Fundamentals: Outlook, Word, and Excel - October 2019 (No Expiration)
